Electrical Safety and the Modern Workplace

The need for electrical safety in the workplace has become increasingly obvious in the last half of the twentieth century and the first half of the twenty-first. Increased government regulations, new discoveries relating to electrical hazards, improved personal protective equipment, and more modern engineering tools have all combined to increase the need for and the availability of improved safety in the design, operation, and maintenance of a modern utility, industrial, and/or commercial electrical power system.

Experience

For twenty years, Cadick Corporation has been providing electrical safety services of various kinds using personnel with an accumulated experience base of hundreds of years. A partial list of our world-wide client base includes companies such as:

- Phelps Dodge Mining Corporation
- Millenium Chemicals
- General Electric
- ITT Goulds Pump
- Elkem Metals Company
- Archer Daniels Midland
- US Steel
- Garland Power and Light
  ... and many others!

Benefits

With our multiple years of “in-the-trenches” experience, Cadick Corporation can work with you in any and all of your safety needs. Whether your electrical safety program is starting from scratch or you want someone to review a well-established program, look to Cadick Corporation for the best electrical safety services available.
